

PWT Data Analysis (Modified Variables)

Samuel Suárez

September 16, 2026

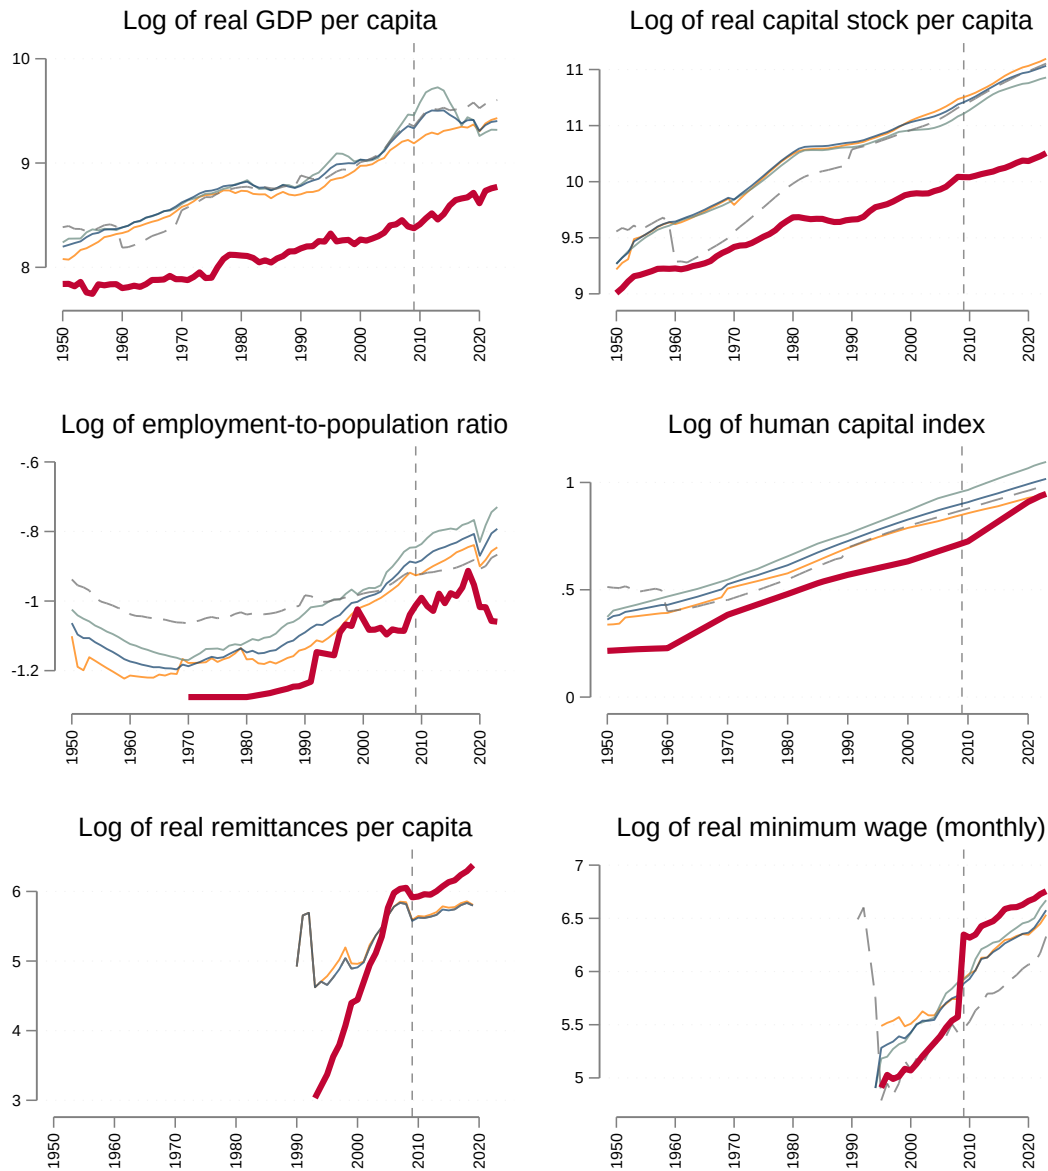

Contents

1	Log-transformed variables	1
2	First-differenced variables	6

This report collects the log-transform and first-difference counterparts of the "Comparison of averages" figures in the main **PWT Data Analysis** report, produced by `02b_PWT_data_analysis.do` section 6 from the `log_*/diff_*` variables built in `01b_PWT_data_cleaning.do` section 6. Each figure plots Honduras (thick cranberry line) against the yearly cross-country mean of Central America & the Caribbean, South America, Latin America and the World; the dashed vertical line marks the 2009 coup. South America contributes no remittances series (no CEPAL coverage).

1 Log-transformed variables

Honduras vs. regional averages -- Log transform, 1950-2020

Cranberry (thick) = Honduras; orange = Central America & Caribbean;
 teal = South America; navy = Latin America; grey dashed = World.
 Dashed vertical line = 2009 coup.

Figure 1: All variables (log): Honduras vs. regional yearly averages (overview grid).

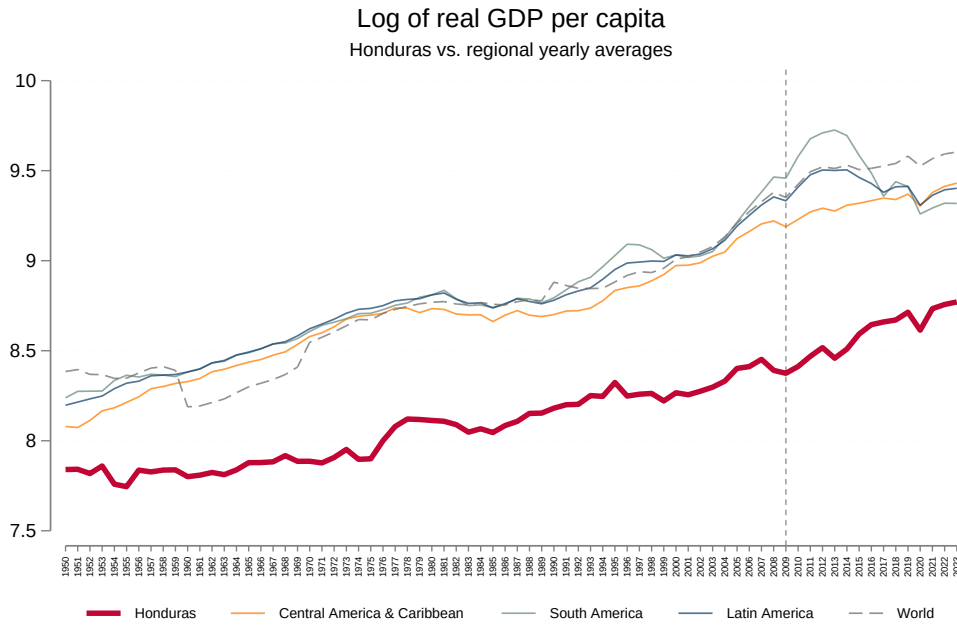

Figure 2: Log of real GDP per capita: Honduras vs. regional averages.

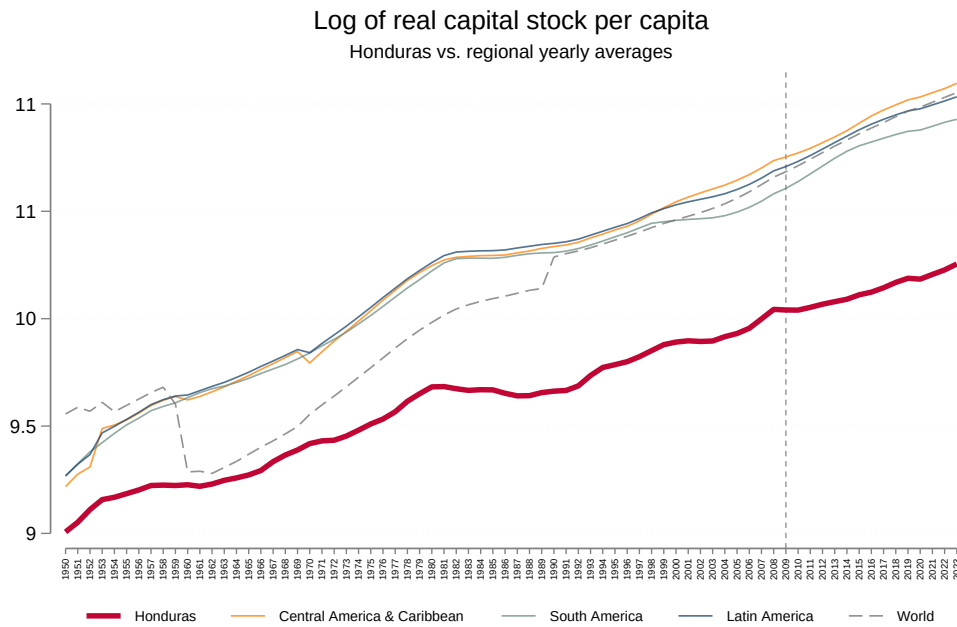

Figure 3: Log of real capital stock per capita: Honduras vs. regional averages.

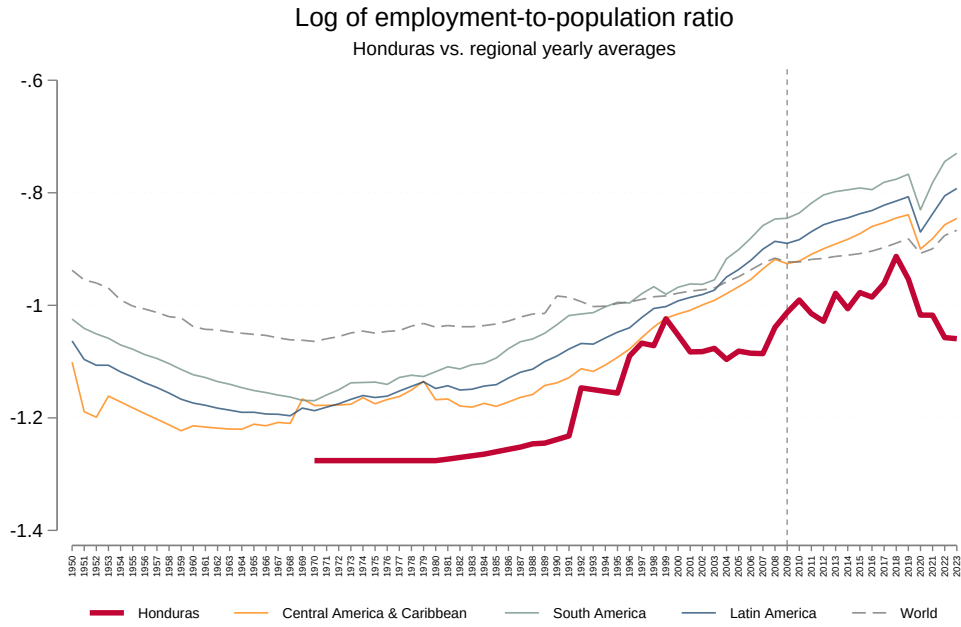

Figure 4: Log of employment-to-population ratio: Honduras vs. regional averages.

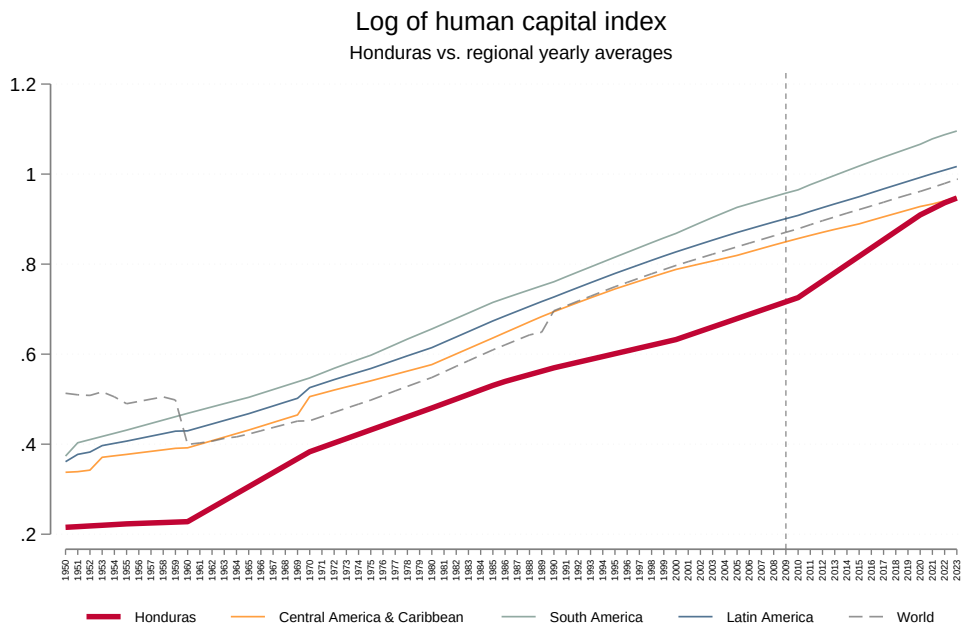

Figure 5: Log of human capital index (Penn World Table): Honduras vs. regional averages.

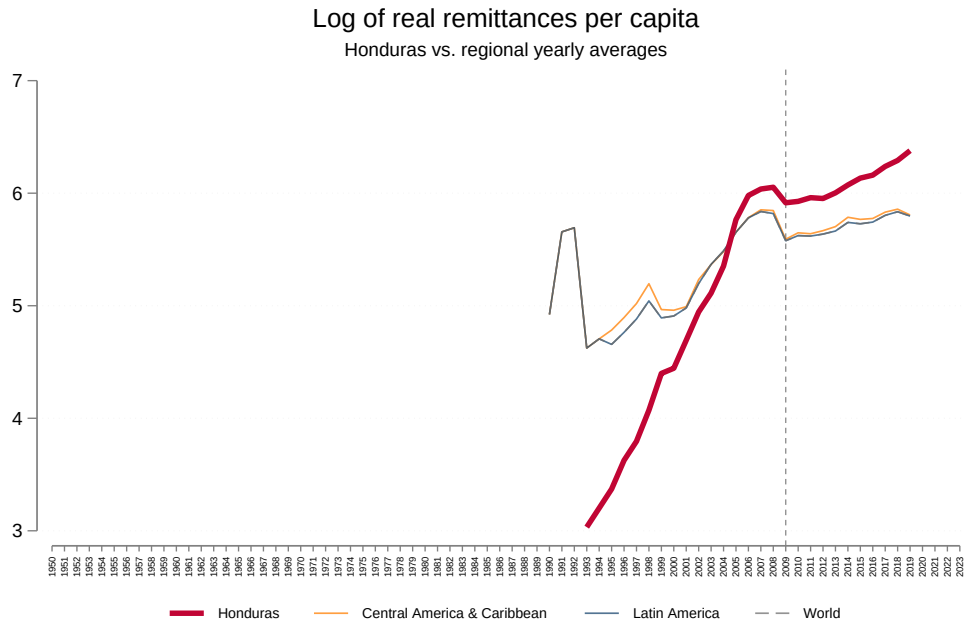

Figure 6: Log of real remittances per capita: Honduras vs. regional averages.

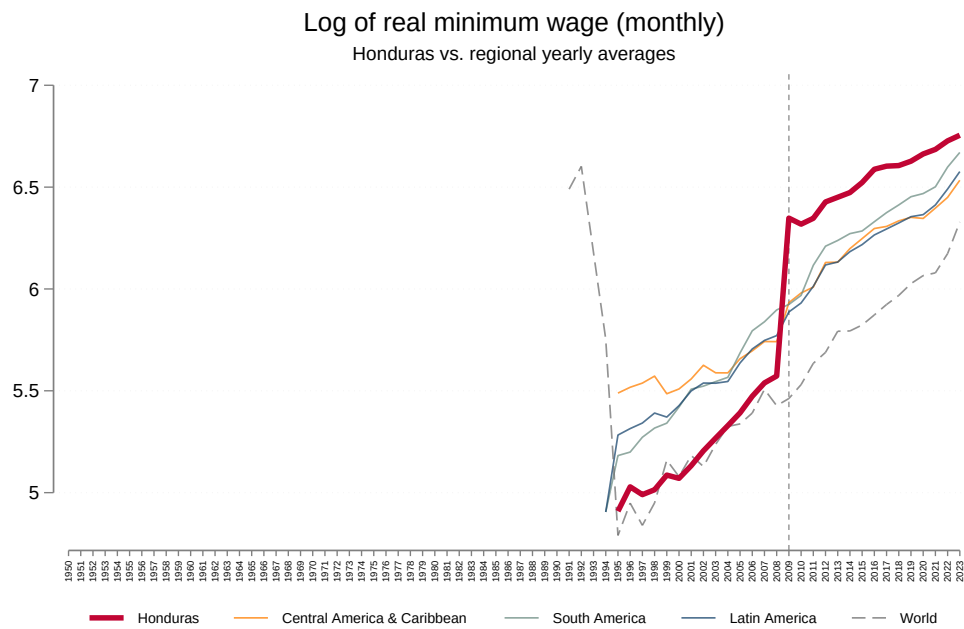

Figure 7: Log of real minimum wage, monthly: Honduras vs. regional averages.

2 First-differenced variables

Each series is the year-over-year change (current year minus previous year); gaps in the underlying panel leave the difference missing rather than spanning the gap.

irras vs. regional averages -- First difference transform, 1950

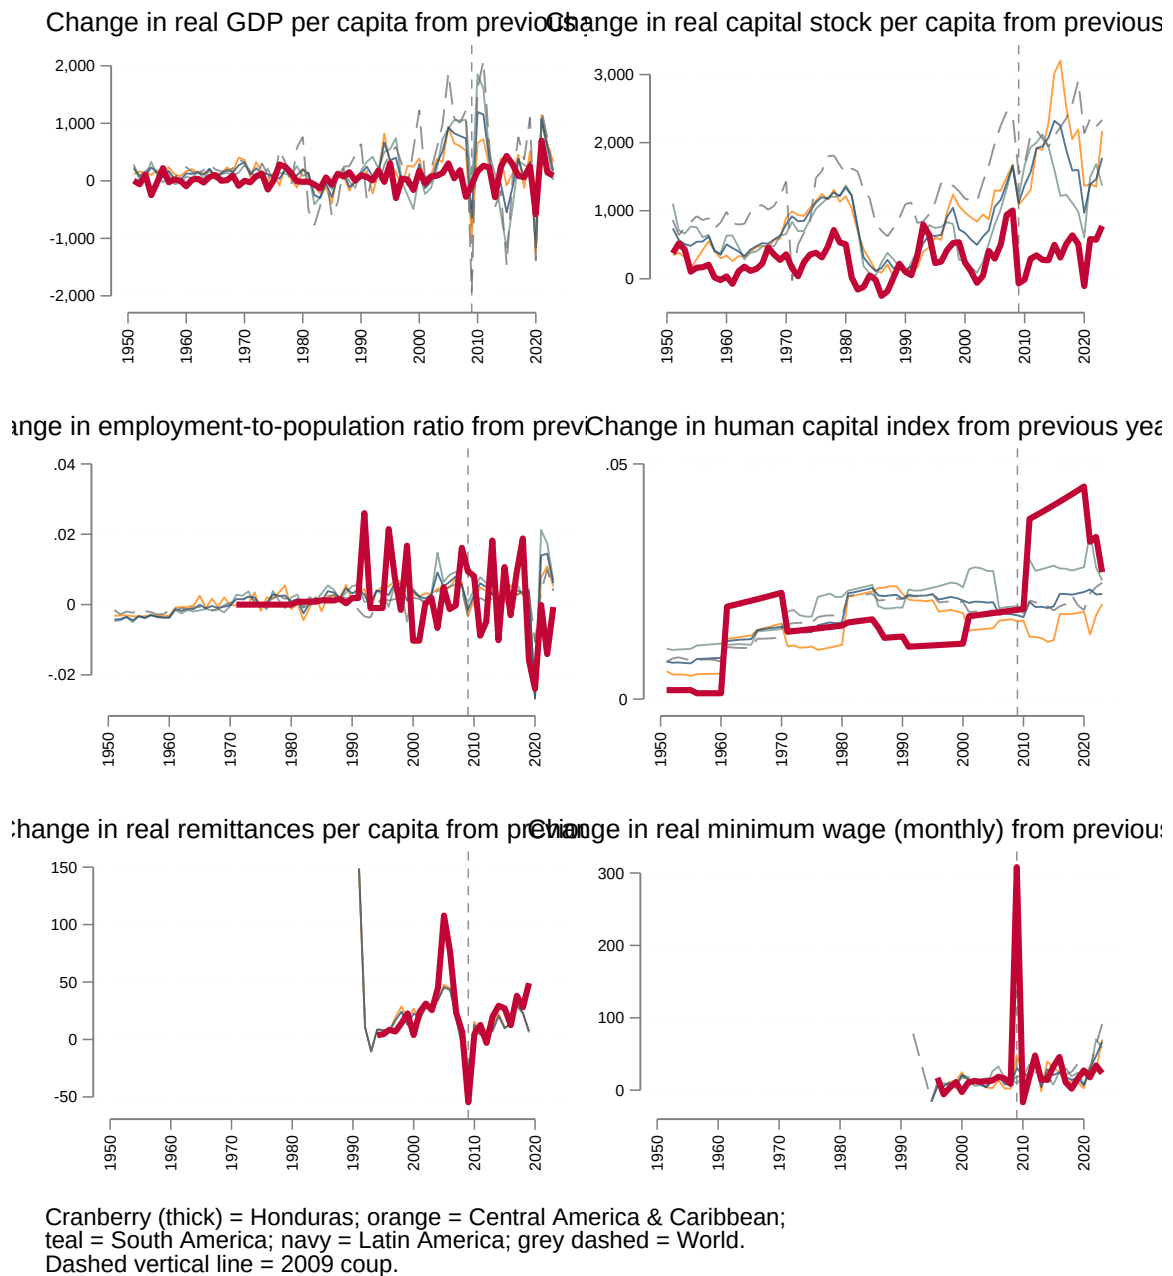

Figure 8: All variables (first difference): Honduras vs. regional yearly averages (overview grid).

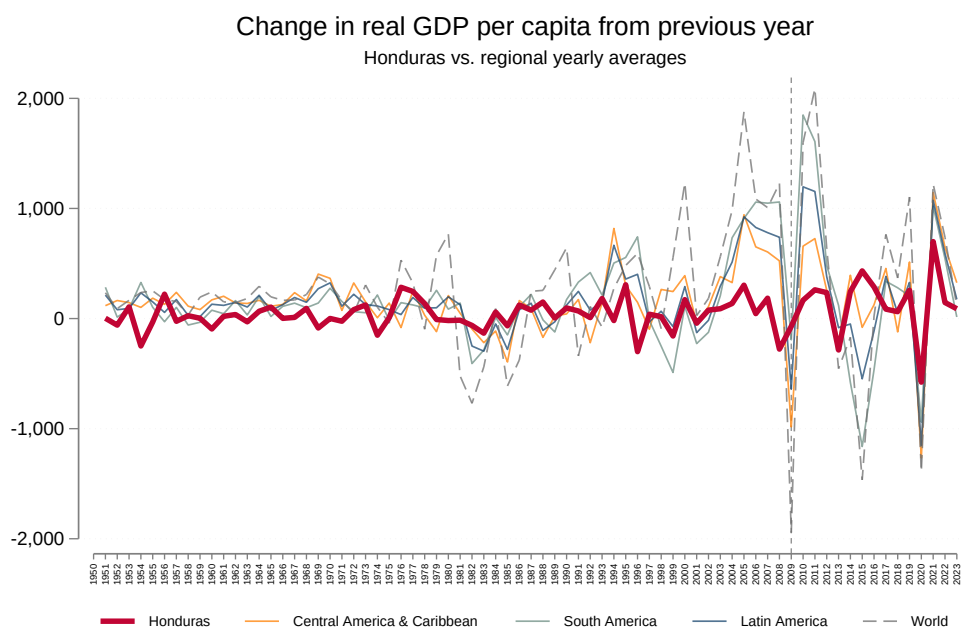

Figure 9: Change in real GDP per capita from previous year: Honduras vs. regional averages.

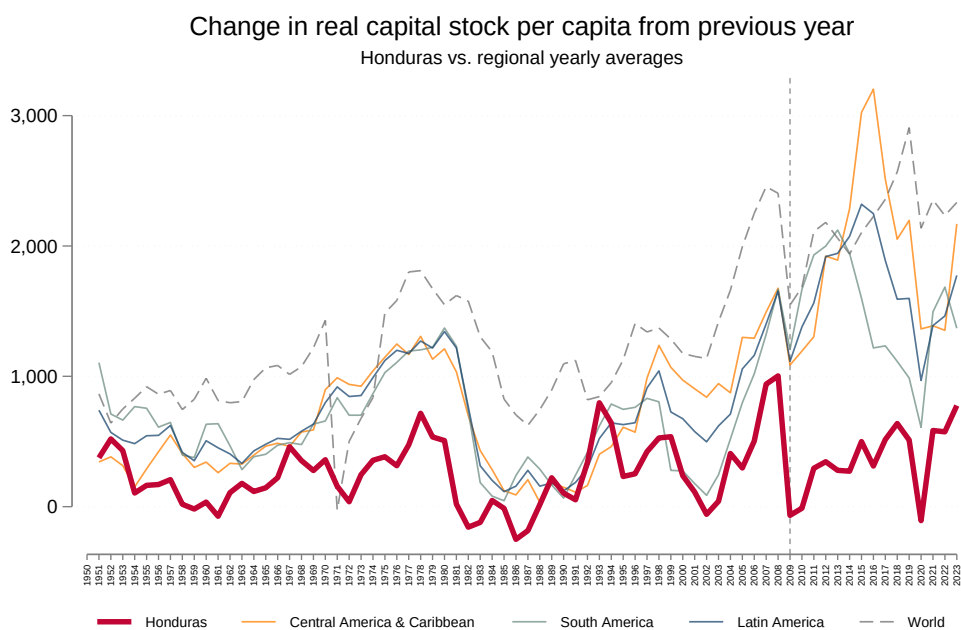

Figure 10: Change in real capital stock per capita from previous year: Honduras vs. regional averages.

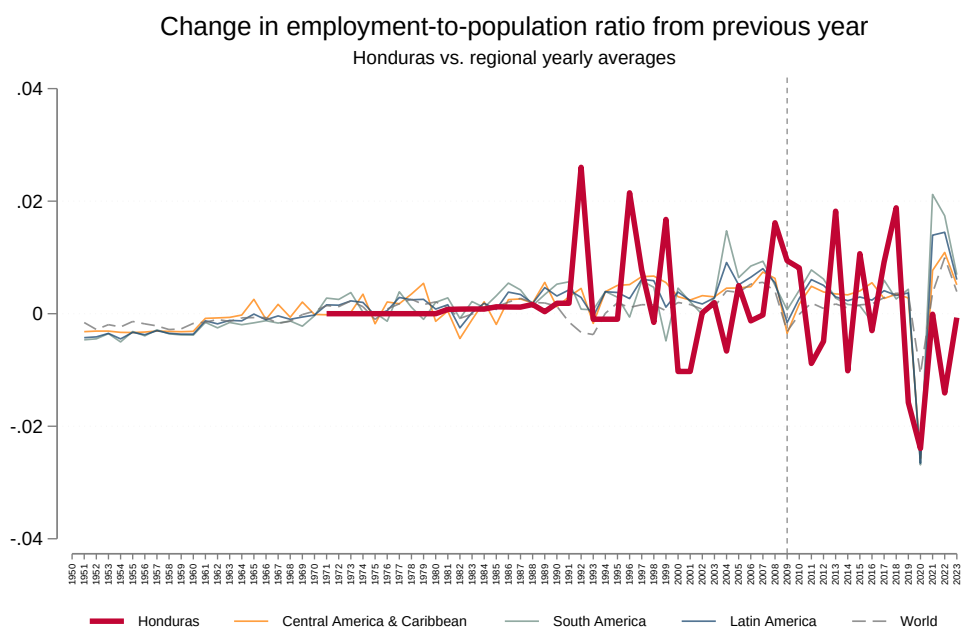

Figure 11: Change in employment-to-population ratio from previous year: Honduras vs. regional averages.

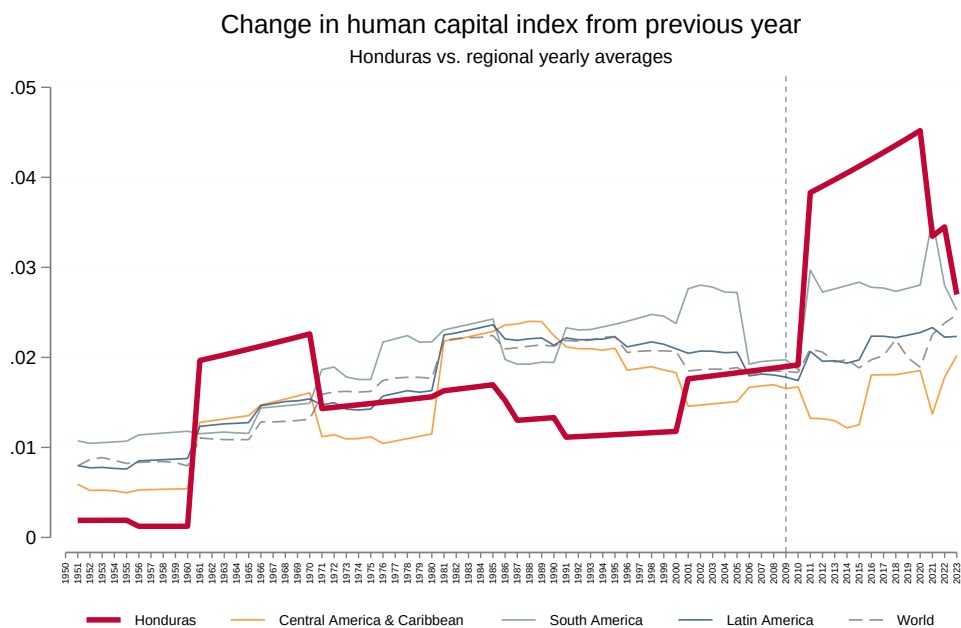

Figure 12: Change in human capital index from previous year: Honduras vs. regional averages.

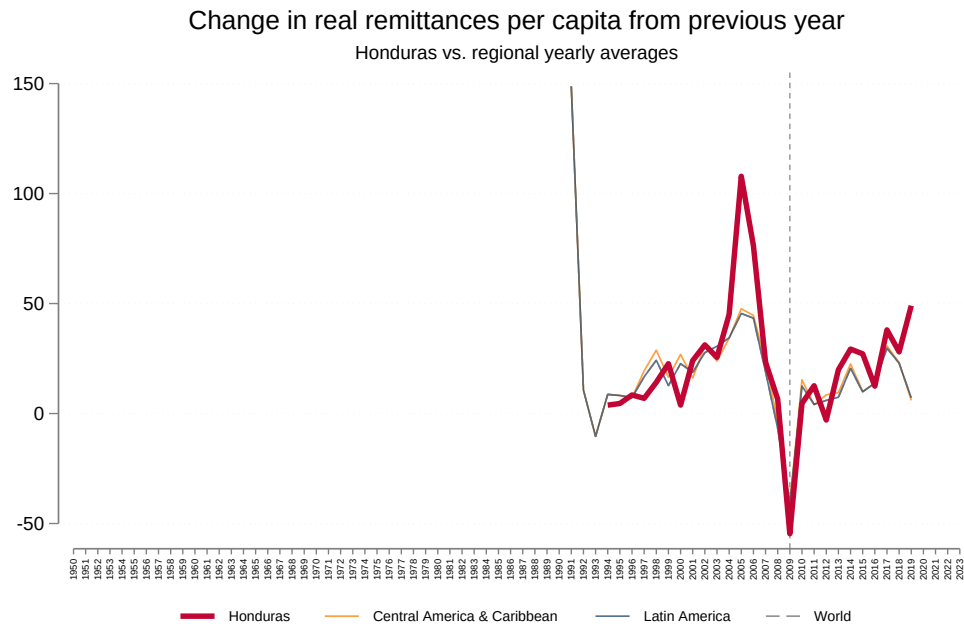

Figure 13: Change in real remittances per capita from previous year: Honduras vs. regional averages.

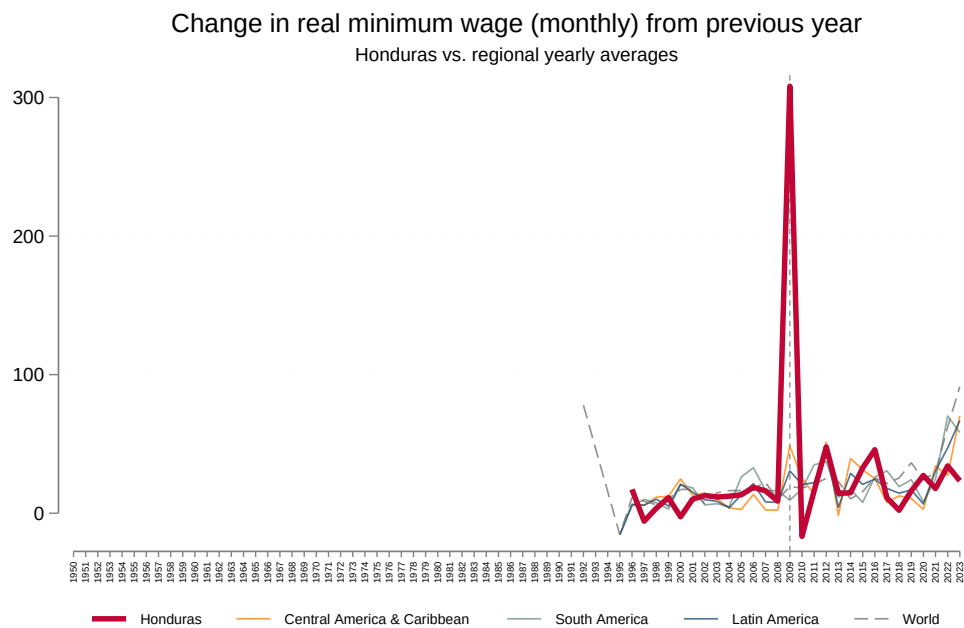

Figure 14: Change in real minimum wage (monthly) from previous year: Honduras vs. regional averages.
