September 9, 2026

Contents

1	Summary statistics	1
2	Comparison of averages	3
3	Data availability by country	8
4	Aprendizajes (ejercicios de Cunningham)	11

This report collects the descriptive output produced by `02b_PWT_data_analysis.do` (in `Honduras Exccercises/do/`): summary statistics for the key per-capita variables, a comparison of Honduras against regional yearly averages, and a country-level data-availability table. All monetary series are real — GDP, capital and remittances per capita in constant 2021 USD, the minimum wage in constant 2021 PPP USD; the employment-to-population ratio and the Penn World Table human-capital index are unitless.

1 Summary statistics

Tables 1–4 report, for each sample, the number of country–year observations, the mean, standard deviation, minimum, median and maximum of every variable. The samples are nested: Honduras $\subset$ Central America & the Caribbean $\subset$ Latin America $\subset$ World. N is variable-specific (pairwise): human capital, remittances and the minimum wage are observed for far fewer country–years than GDP.

Table 1: Summary statistics — Honduras

	N	Mean	SD	Min	Median	Max
Real GDP per capita	74	3,649.49	1,118.62	2,310.43	3,359.33	6,444.10
Real capital stock per capita	74	16,677.22	5,615.73	8,160.15	15,794.59	28,417.45
Employment / population	54	0.32	0.04	0.28	0.34	0.40
Human capital index	74	1.74	0.38	1.24	1.72	2.58
Real remittances per capita	27	277.73	188.46	20.75	370.56	588.76
Real minimum wage (monthly)	29	453.26	271.31	135.50	554.59	858.16

Table 2: Summary statistics — Central America & the Caribbean

	N	Mean	SD	Min	Median	Max
Real GDP per capita	1,584	16,345.90	16,473.01	1,264.44	10,270.34	105,390.15
Real capital stock per capita	1,546	62,463.82	60,604.38	3,469.34	39,043.94	309,233.51
Employment / population	1,175	0.38	0.09	0.18	0.36	0.78
Human capital index	844	2.01	0.54	1.14	1.95	3.27
Real remittances per capita	155	325.18	220.70	20.75	292.50	962.24
Real minimum wage (monthly)	386	494.45	201.48	93.58	483.24	1,036.00

Table 3: Summary statistics — Latin America

	N	Mean	SD	Min	Median	Max
Real GDP per capita	2,504	13,809.07	13,985.84	159.08	9,172.94	105,390.15
Real capital stock per capita	2,412	54,313.50	52,147.56	1,893.27	37,539.71	309,233.51
Employment / population	2,082	0.37	0.08	0.18	0.36	0.78
Human capital index	1,710	2.08	0.52	1.14	2.04	3.36
Real remittances per capita	180	309.08	210.72	20.75	252.51	962.24
Real minimum wage (monthly)	673	464.22	213.02	93.58	453.17	1,039.64

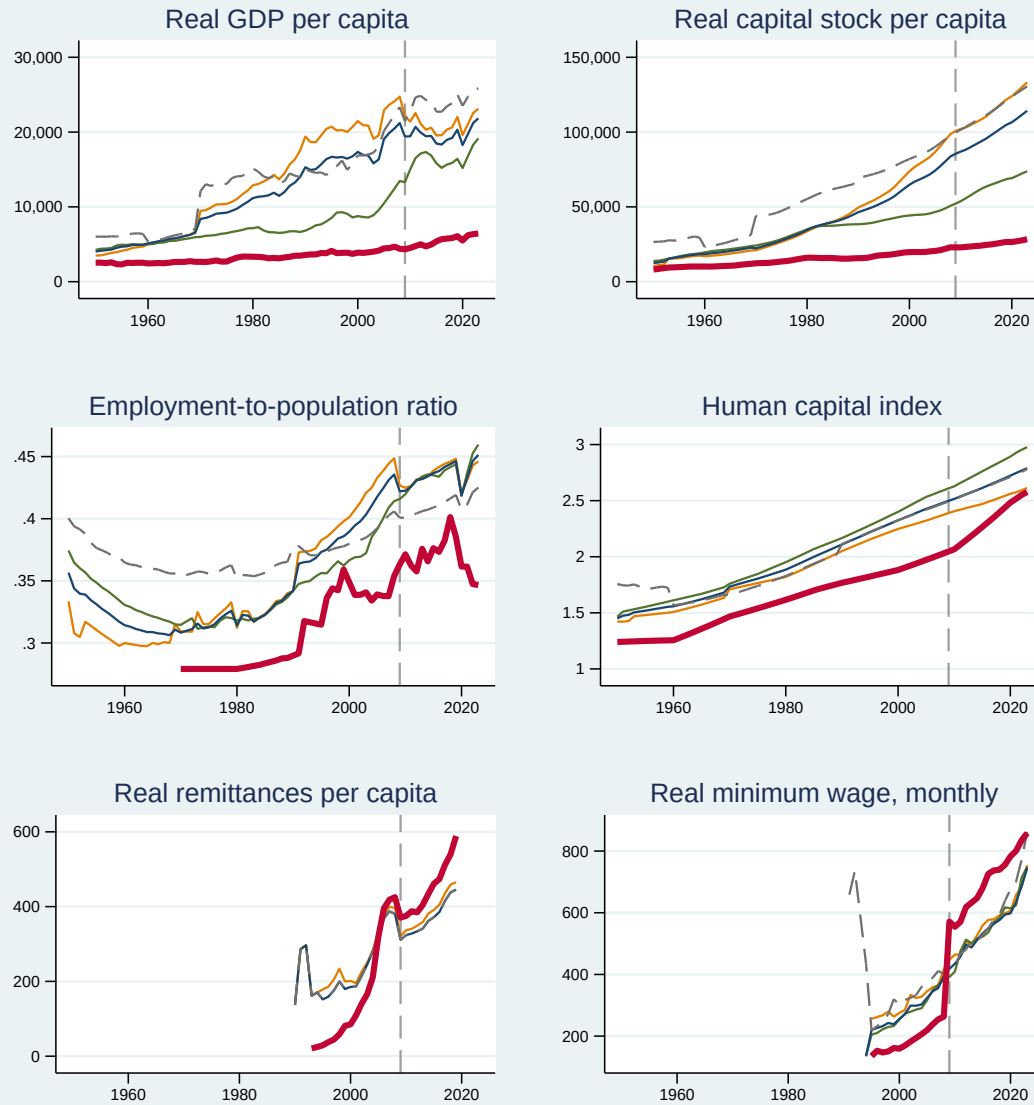

Table 4: Summary statistics — World (full PWT panel)

	N	Mean	SD	Min	Median	Max
Real GDP per capita	11,201	16,087.64	23,535.34	159.08	7,872.68	338,651.08
Real capital stock per capita	11,028	72,944.83	105,515.71	155.70	32,200.83	1,631,548.15
Employment / population	10,307	0.38	0.10	0.06	0.38	0.80
Human capital index	9,217	2.13	0.74	1.01	2.04	3.99
Real remittances per capita	180	309.08	210.72	20.75	252.51	962.24
Real minimum wage (monthly)	3,294	496.63	483.44	0.03	347.65	3,581.20

2 Comparison of averages

Each figure plots Honduras (thick cranberry line) against the yearly cross-country mean of Central America & the Caribbean, South America, Latin America and the World. The dashed vertical line marks the 2009 coup. South America contributes no remittances series (no CEPAL coverage).

Honduras vs. regional averages, 1950-2023

Cranberry (thick) = Honduras; orange = Central America & Caribbean; green = South America; navy = Latin America; grey dashed = World.
Dashed vertical line = 2009 coup. South America has no remittances data.
Panel y-axes: GDP, capital, remittances = constant 2021 USD; minimum wage = 2021 PPP USD; employment/population and human capital index are unitless.

Figure 1: All variables: Honduras vs. regional yearly averages (overview grid).

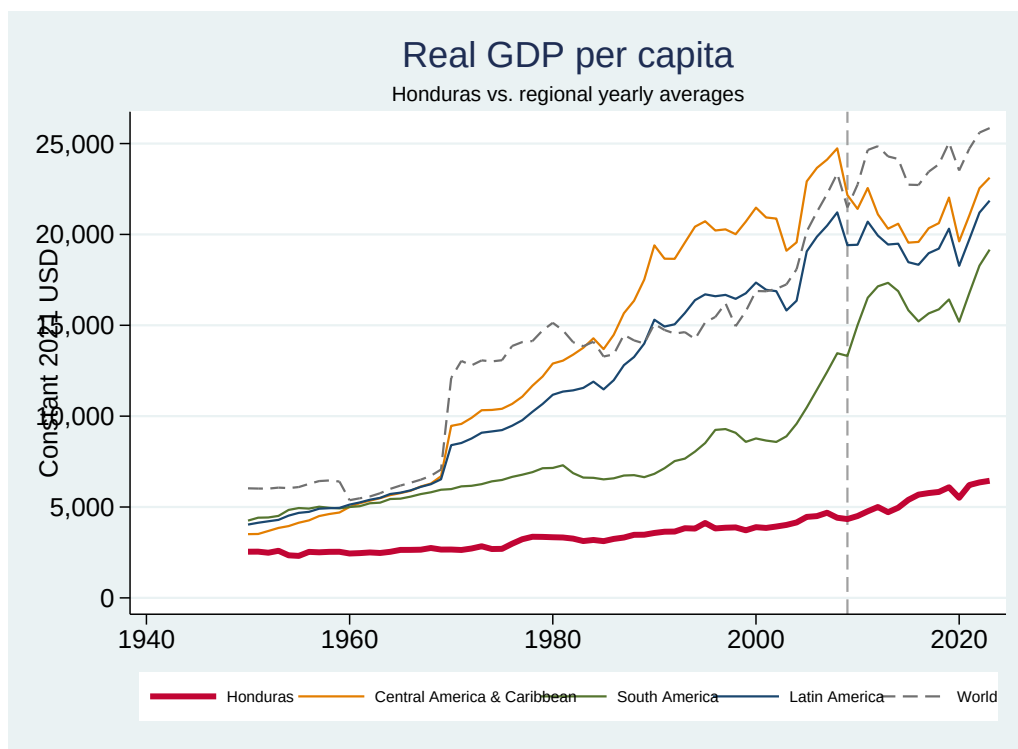

Figure 2: Real GDP per capita (constant 2021 USD): Honduras vs. regional averages.

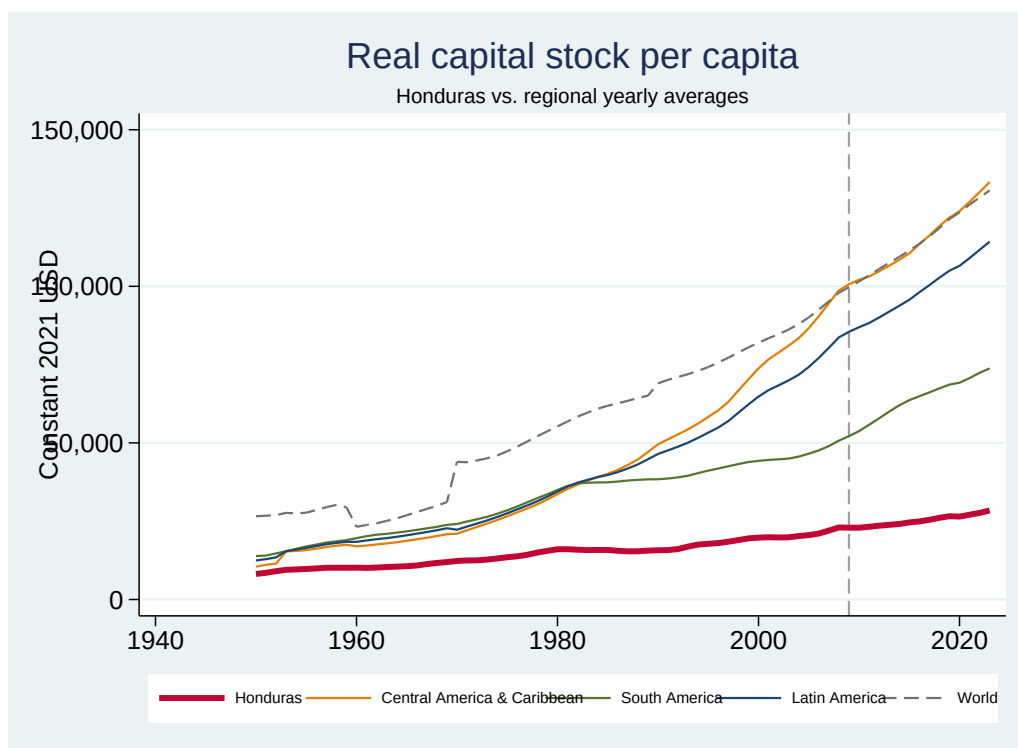

Figure 3: Real capital stock per capita (constant 2021 USD): Honduras vs. regional averages.

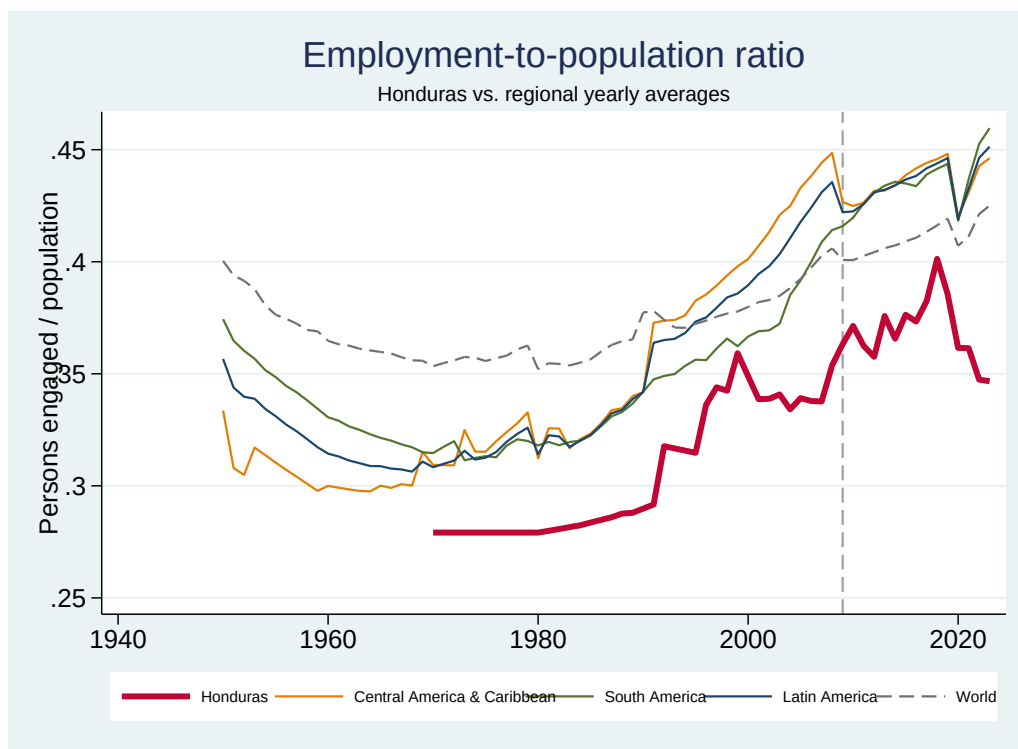

Figure 4: Employment-to-population ratio: Honduras vs. regional averages.

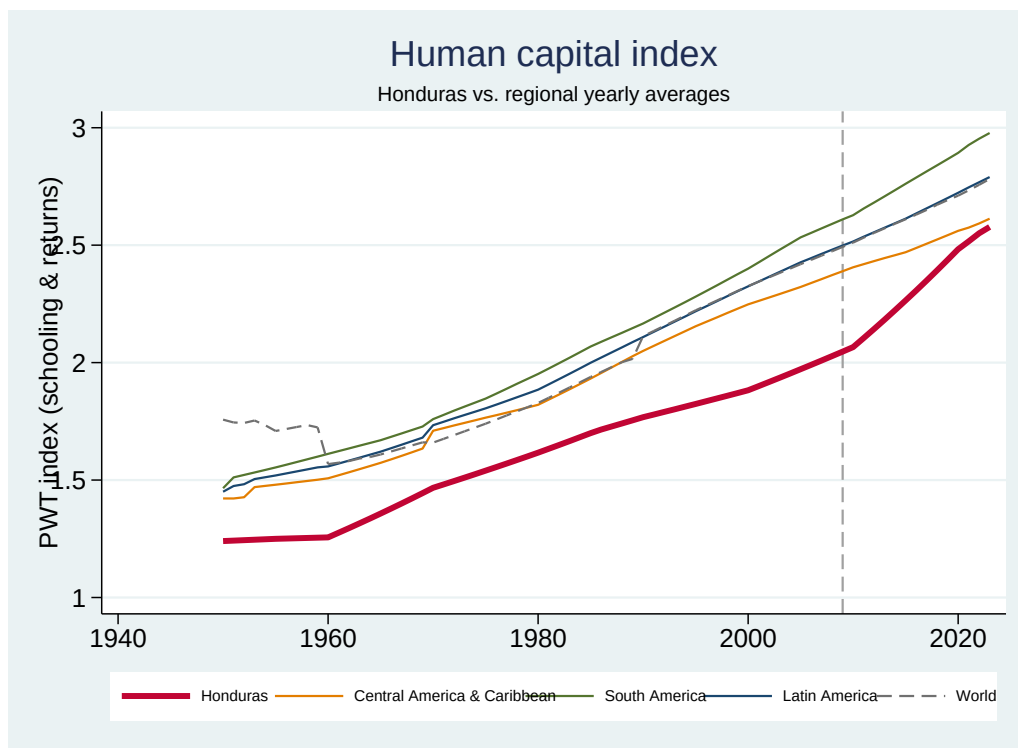

Figure 5: Human capital index (Penn World Table): Honduras vs. regional averages.

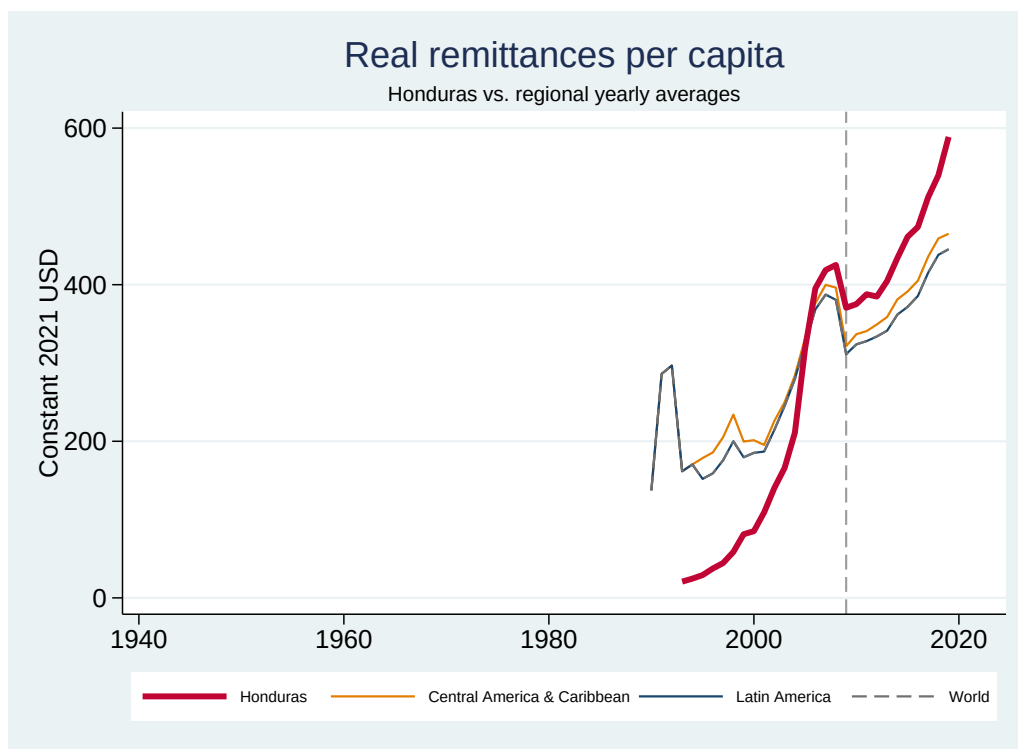

Figure 6: Real remittances per capita (constant 2021 USD): Honduras vs. regional averages.

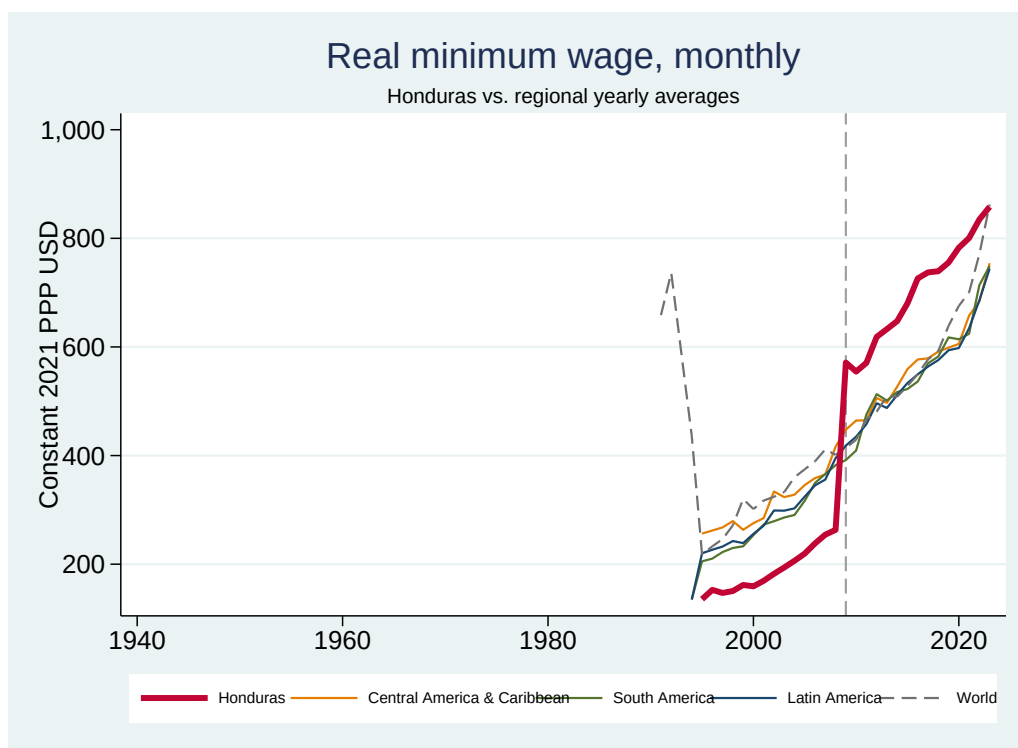

Figure 7: Real minimum wage, monthly (constant 2021 PPP USD): Honduras vs. regional averages.

3 Data availability by country

Table 5 lists, for every Penn World Table country, the span of years each variable is observed: **first-last**, a lone year if only one is present, a trailing * if the span has internal gaps, and . if the variable is never observed. Remittances are available only for the eight CEPAL countries; the minimum wage is the ILO “2021 PPP \$” slice.

Table 5: Availability of the key variables by country. Each cell is the first–last year with non-missing data (a lone year if only one), with a trailing * if the series has internal gaps; a dot means the variable is never observed.

Country	Region	GDP p.c.	Capital p.c.	Emp/pop	Human cap.	Remitt. p.c.	Min. wage

4 Aprendizajes (ejercicios de Cunningham)

Notas tomadas de `Cunningham Exercises/Texas_Prisons/Do/Script.do` (método de control sintético, réplica de Texas), que orientan las preguntas abiertas de `questions.txt`.

Sobre predictores y *matching*

Aprendizajes:

- 1) Es útil ver para honduras `gdp_mean` vs `gdp_honduras`. Los años donde honduras se desvíe pueden ser usados como regresores como proxy de los no observados. Esto es como decirle al modelo: Considera que honduras se desvió en t año y por lo tanto debes darle un peso distinto a los países que tomen en cuenta ese año.
- 2) Lo mismo se puede hacer con otros regresores.
- 3) La combinación de distintos periodos de la variable a predecir
- 4) Dejar una covariable sola (sin el año) hace que se tome un promedio de su valor en todos los años en el matching discrepancy.
- 5) Si los pesos se hacen con las x , esto implica que estamos asumiendo que Y es una función lineal de las x . DUDA $\rightarrow$ Entonces como se hace con ML?

Sobre el tamaño del *donor pool* y los p-valores

Aprendizajes:

Con todos los países de centro américa no basta para tener signif. estadíst.

El mejor p-valor posible es $1/7 = 0.143$.

Para un p-valor de 0.1, se necesitan 10 países.

Para un p-valor de 0.05, se necesitan 20 países. $\rightarrow$ America Latina basta

Para un p-valor de 0.01, se necesitan 100 países. $\rightarrow$ El sur global tiene 173
